

## A set

**Supplementary Fig. 3.** The upper 3 panels and lower 3 panels show the Kaplan-Meier curves for the platinum-free interval, disease-free survival, and overall survival in groups A and B, respectively. Dotted lines depict high C-reactive protein (CRP) level ( $\geq 1.0$  mg/dL), while solid lines depict low CRP level ( $< 1.0$  mg/dL). <sup>a</sup> $P<0.05$ .
